BOLIVIA IS NOT FOR SALE! *Believing the revolution in Bolivia*

- *In the last few years Bolivia has seen huge protest movements against privatisation of gas and water, the unjust tax system there and successive right-wing governments.*
- *Students and workers have led the movements which have successfully toppled a number of presidents and brought the left-leaning President Morales to power.*
- *Now in Bolivia, Venezuela and throughout Latin America, the need for a socialist alternative to capitalism is firmly on the agenda.*
- *This 35 minute documentary captures the events in Bolivia including the Water, Gas and Tax Wars. It is a must see for all who wish to see similar movements built here to fight against environmental destruction, war, privatisation and low pay.*
